__repr__

code.WBA_trace.transition.
__str__

```
graph LR; A["code.WBA_trace.transition.__repr__"] --> D["code.WBA_trace.transition.__str__"]; B["code.WBA_trace.pathSegment.__repr__"] --> D; C["code.WBA_trace.lasso.__repr__"] --> D;
```

The diagram illustrates a relationship between three repr methods and a str method. On the left, three white rectangular boxes are stacked vertically. Each box contains a text label representing a method: 'code.WBA_trace.transition.__repr__', 'code.WBA_trace.pathSegment.__repr__', and 'code.WBA_trace.lasso.__repr__'. On the right, there is a single gray rectangular box containing the text label 'code.WBA_trace.transition.__str__'. Three blue arrows originate from the right side of each white box and point towards the left side of the gray box, indicating that these three repr methods are associated with or delegate to the str method.
