__repr__

code.WBA_trace.lasso.
__repr__

code.energy.EnergyFunction.
__str__

```
graph LR; A["code.WBA_trace.transition.__repr__"] --> D["code.energy.EnergyFunction.__str__"]; B["code.WBA_trace.pathSegment.__repr__"] --> D; C["code.WBA_trace.lasso.__repr__"] --> D;
```

The diagram illustrates a mapping or dependency from three source objects to a single target object. On the left, three white rectangular boxes are stacked vertically. Each box contains a string representing a code object's representation method: 'code.WBA_trace.transition.__repr__', 'code.WBA_trace.pathSegment.__repr__', and 'code.WBA_trace.lasso.__repr__'. On the right, there is a single gray rectangular box containing the string 'code.energy.EnergyFunction.__str__'. Three blue arrows originate from the right side of each white box and point towards the left side of the gray box, indicating that each of the three source objects is associated with or mapped to the target object.
