NestedLoopsBuilder.update

code.stairs_builder.Stairs
Builder.update

code.devilCircles.DevilBuilder.
__init__

```
graph LR; A[code.devilCircles.DevilBuilder.update] --> D[code.devilCircles.DevilBuilder.__init__]; B[code.nested_loops_builder.NestedLoopsBuilder.update] --> D; C[code.stairs_builder.StairsBuilder.update] --> D;
```

The diagram illustrates a dependency or initialization flow. On the left, three white rectangular boxes with black borders contain the following text: 'code.devilCircles.DevilBuilder.update' (top), 'code.nested_loops_builder.NestedLoopsBuilder.update' (middle), and 'code.stairs_builder.StairsBuilder.update' (bottom). On the right, a gray rectangular box contains the text 'code.devilCircles.DevilBuilder.__init__'. Three blue arrows originate from the right side of each white box and point towards the left side of the gray box, indicating that each of the three update methods is associated with or calls the __init__ method.
