

code.devilCircles.DevilBuilder.update

code.nested_loops_builder.
NestedLoopsBuilder.update

code.stairs_builder.Stairs
Builder.update

code.energy.EnergyFunction.
__init__

```
graph LR; A[code.devilCircles.DevilBuilder.update] --> D[code.energy.EnergyFunction.__init__]; B[code.nested_loops_builder.NestedLoopsBuilder.update] --> D; C[code.stairs_builder.StairsBuilder.update] --> D;
```

The diagram illustrates a dependency or inheritance relationship. Three source functions, each in a white box with a black border, point via blue arrows to a single target function in a gray box with a black border. The source functions are: 1) 'code.devilCircles.DevilBuilder.update' at the top left, 2) 'code.nested_loops_builder.NestedLoopsBuilder.update' in the middle left, and 3) 'code.stairs_builder.StairsBuilder.update' at the bottom left. The target function is 'code.energy.EnergyFunction.__init__' on the right.
